Accuracy

Every effort was made to have as accurate a picture of Mount Si High School Outdoor Track and Field history as possible. Any error; misspellings, typos, missed results, or any other mistakes, are the fault of the compiler.

Quality

The listing of event results has been capped at 80 for the Boy's and Girl's programs, plus ties. This is in recognition of the High School's celebration of 80 years in 2024. The Boy's program began in Mount Si's first year as a high school, 1944-1945. The Girls program officially began in 1972, though a few girl's events were included at the Mount Si Invitational from 1969-1971.

Source for Results

1945-1961 – Event results for these years were taken from published articles in the *Valley Record*. The weekly local newspaper was fairly good at recognizing names with events but actual event results were few and far between. At present no records have been discovered in any Mount Si files.

1962-present – Starting in 1962 the track coaches published a yearbook at the end of the season which included all meet results that year. An exception was 1975. These

yearbooks were the primary source for all records into the mid to late 2000's. The 2000's saw the website athletic.net start posting complete meet results online.

Timing track events

The timing standard for all running events is currently Fully Automatic Timing (FAT). FAT became almost universally used in the mid 2000's. Prior to FAT running events were all hand timed with a stopwatch, noted by an 'h' after the time. FAT times will be listed to the hundredth of a second, hand times to a tenth of a second. A universally accepted factor was used to enable the two methods to be compared. A small human reaction time is added to the hand times based on scientific studies. The 100m, 100H, 110H, 200m, and 4X100m relay, all add 0.24 sec. to the hand timed result for these lists. All other running events add 0.14 sec. This differs from the national high school federation practice of adding 0.24 sec. to all hand times. This was based on the practice of the program at the time FAT was becoming universal. Hand times are listed with the original times, as recorded, followed by a FAT adjusted equivalent.

English/Metric-track distances

The change from English track race distances to Metric distances took place officially from the 1979 season to 1980. For practical purposes the transition took longer with many meets still using the English distances as the tracks were still 440 yards, not yet changed to 400 meters. Most running events, 220y/200m, for example, were so close in respective distances that a mathematical factor was applied to make them directly comparable. Or at least as close as possible. This allowed the times to all be presented all in one all-time list. This includes 110mH/120yH, 440y/400m, 880y/800m, Mile/1600m, 2 Mile/3200m, and both relays. All English distances are noted by 'Y' after the time. English distance times in these events are factored to their Metric equivalent by multiplying the time of the English distance by .9942, then rounding **up** to the next tenth of a second to achieve a FAT equivalent and by adding a reaction time factor when needed. For these events the Metric distance is slightly shorter than the English distance. For the 120y change to 110m hurdles, the Metric measure is slightly longer than the English distance. Just over 10 inches. This difference is not significant enough to have any adjustment in comparing the two events, especially when the times were measured in tenths. They will be treated as equal in his listing. The 100y is not close enough to its Metric cousin to have any reliable mathematics to make them comparable. The short sprint will have a Metric and an English all-time list.

Field Events-English measures

All high school field events continue to use feet and inch measures.

Washington State Track and Field Meet

A Mount Si Track and Field history would not be complete without including the individuals who participated in the state meet. Mount Si has produced two Washington State Track and Field Meet Team Champions, 1964 and 1985, and multiple individual state champions. Listed are all the athletes who qualified and participated in the state meet, along with the marks achieved in the state meet.

Of note are those individuals who competed in more than one state meet and those who placed in more than one event in the state championships.
